## EDUCATION

### JSS Academy of Technical Education

Bachelor of Technology (B.Tech) - Computer Science Engineering

2023 – 2027

CGPA: 8.31

## EXPERIENCE & VOLUNTEERING

### CodexIntern (Web Developer Intern)

- Developed a highly responsive front-end web application, optimized cross-device compatibility to deliver seamless user experiences and improved page load time.
- Built reusable React.js UI components, reducing code redundancy and streamlining long-term application maintenance.

### Freelance Full Stack Developer

[Live Demo](#)

- Developed and deployed a full-stack MERN application for a real client, featuring dedicated client and admin dashboards for business management.
- Built secure RESTful APIs using Node.js, Express.js, and MongoDB, implementing JWT-based authentication and role-based access control.

### Akshargyan NGO, JSS Academy of Technical Education – Web Dev Team Lead & Volunteer 2024 – Present

- Lead the development of the society's official website using Next.js, improving community outreach.
- Conducted educational sessions for underprivileged students and supported event organization and outreach activities.

## SKILLS

|                  |                                                                     |
|------------------|---------------------------------------------------------------------|
| Languages:       | Python, C, C++, JavaScript, TypeScript, SQL, HTML5, CSS3            |
| Frameworks:      | React.js, Next.js, Node.js, Express.js, Redux Toolkit, Tailwind CSS |
| AI/GenAI:        | LLMs Integration, RAG, Vector Embeddings, Pinecone (Vector DB)      |
| Databases/Tools: | MongoDB, PostgreSQL, Redis, Docker, Git/GitHub, Postman, VS Code    |
| Concepts:        | Data Structures & Algorithms, OOPs, DBMS, CI/CD, AWS(EC2)           |

## PROJECTS

### CodeOrbit — Next.js, TypeScript, Prisma, PostgreSQL, Inngest, Pinecone

[Github](#)

- Pioneered a **full-stack code review platform** using Next.js and TypeScript, seamlessly integrating the **GitHub API** to automate **pull request analysis** and deliver instantaneous actionable feedback.
- Orchestrated **background workflows** utilizing **Inngest** to process **webhook events** asynchronously, leveraging **automatic retries** to ensure reliable repository synchronization.
- Devised **Retrieval-Augmented Generation (RAG)** pipelines leveraging **Gemini AI** and **Pinecone Vector DB**, providing **context-aware suggestions** to accelerate developer workflows, and integrated Polar for **subscription-based access control** to manage **repository connection limits** per user plan.

### CodeSphere — MERN, Judge0 API, Monaco Editor, Google Gemini, AWS(EC2)

[Github](#)

- Developed an online coding platform featuring secure JWT authentication, **role-based access control**, **user profiles**, and comprehensive **problem management**.
- Integrated **Judge0 API** to securely compile and execute code across multiple programming languages, supporting **custom and hidden test case validation**, **submission tracking**, and **real-time execution results**.
- Integrated **Monaco Editor** to provide syntax highlighting and **multi-language support** for writing code.
- Built **AI-powered assistance** to provide smart hints and algorithm explanations, and developed an **admin dashboard** for coding problem management.
- Containerized the application using **Docker** and deployed it on **AWS EC2** with **Docker Compose**, implementing a **GitHub Actions CI/CD pipeline** for automated build validation and deployment.

### ShopEasy — React.js, Node.js, Express.js, MongoDB, Redux Toolkit, Tailwind CSS,

[Github](#)

- Spearheaded a robust **full-stack e-commerce** architecture using the **MERN stack**, implementing **JWT-based stateless authentication** and integrating **Razorpay** for frictionless transaction processing.
- Designed a **responsive user interface** with **React.js** and **Tailwind CSS**, leveraging **Redux Toolkit** for **centralized state management**, achieving faster real-time product filtering.
- Developed a comprehensive **role-based admin dashboard** to streamline **inventory management**, implementing **RESTful APIs** for efficient **product, order, and user management**.

## ACHIEVEMENTS

- Secured a **Top 10** position among **120 teams** in the **Smart India Hackathon 2025** -Internal College Round, demonstrating strong problem-solving and rapid development skills.
- Solved **800+ DSA problems** across **LeetCode** and **GeeksforGeeks**, covering a wide range of data structures and algorithms, with **{LeetCode Rating: 1775+}**.
- Competitive Programming:** Solved **190+ algorithmic challenges** on **Codeforces**, strengthening problem-solving and algorithmic optimization skills.
