PROFESSIONAL SUMMARY

Full-stack Software Developer skilled in building web applications using **React.js, Next.js, Node.js, Express.js, MongoDB and PostgreSQL**, with hands-on experience in **REST APIs, JWT authentication**, and **AI/RAG-based projects**. Core knowledge of **DSA, OOP, DBMS, Operating Systems and Computer Networks**, with **950+ DSA problems solved on LeetCode and Codeforces (LeetCode rating: 1800)**.

EDUCATION

JSS Academy of Technical Education

Bachelor of Technology (B.Tech) - Computer Science Engineering

2023 – 2027

CGPA: 8.31

EXPERIENCE & VOLUNTEERING

CodexIntern (Web Development Internship)

- Developed a highly responsive front-end web application, optimized cross-device compatibility to deliver seamless user experiences and improved page load time.
- Built reusable React.js UI components, reducing code redundancy and streamlining long-term application maintenance.

Freelance Full Stack Developer

[Live Demo](#)

- Developed and deployed a full-stack MERN application for a real client, featuring dedicated client and admin dashboards for business management.
- Built secure RESTful APIs using Node.js, Express.js, and MongoDB, implementing JWT-based authentication and role-based access control.

Akshargyan NGO, JSS Academy of Technical Education – Web Dev Team Lead & Volunteer 2024 – Present

- Lead the development of the society's official website using Next.js, improving community outreach.
- Conducted educational sessions for underprivileged students and supported event organization and outreach activities.

SKILLS

Languages: C, C++, Python, Java, JavaScript, TypeScript, SQL, HTML, CSS
Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS
Backend: Node.js, Express.js, Socket.io, REST APIs
Databases: MongoDB, PostgreSQL, MySQL, Redis
AI/GenAI: LLMs Integration, RAG, Vector Embeddings, Pinecone (Vector DB)
Cloud/Tools: Docker, AWS (EC2), CI/CD, Git/GitHub, Postman(API Testing), VS Code, Render, Vercel
Concepts: Data Structures & Algorithms, OOPs, DBMS, OS, Computer Networks, Microservices, SDLC

ACHIEVEMENTS & CERTIFICATIONS

- Secured a **Top 10** position among **120 teams** in the **Smart India Hackathon 2025** - Internal College Round
- Solved **950+ DSA problems** on **LeetCode** and **Codeforces (LeetCode Rating: 1800)**.
- Web Development Internship Certificate** [Credential](#)

PROJECTS

CodeOrbit — Next.js, TypeScript, Prisma, PostgreSQL, Inngest, Pinecone

[Live Demo](#) — [Github](#)

- Pioneered a **full-stack, AI-powered PR code review platform** using Next.js and TypeScript, seamlessly integrating the **GitHub API** to automate **pull request analysis** and deliver **instantaneous actionable feedback**.
- Orchestrated **background workflows** utilizing **Inngest** to process **webhook events** asynchronously, leveraging **automatic retries** to ensure reliable repository synchronization.
- Devised **Retrieval-Augmented Generation (RAG)** pipelines leveraging **Gemini AI** and **Pinecone Vector DB**, providing **context-aware suggestions** to accelerate developer workflows, and integrated **Polar** for **subscription-based access control** to manage **repository connection limits** per user plan.

CodeSphere — MERN, Judge0 API, Monaco Editor, Google Gemini, AWS(EC2)

[Github](#)

- Developed an **online coding platform** featuring secure JWT authentication, **role-based access control**, **user profiles**, and comprehensive **problem management**.
- Integrated **Judge0 API** to securely compile and execute code across multiple programming languages, supporting custom and hidden test case validation, submission tracking, and real-time execution results.
- Integrated **Monaco Editor** to provide syntax highlighting and **multi-language support** for writing code.
- Built **AI-powered assistance** to provide smart hints and algorithm explanations, and developed an **admin dashboard** for coding problem management.
- Containerized the application using **Docker** and deployed it on **AWS EC2** with **Docker Compose**, implementing a **GitHub Actions CI/CD pipeline** for automated build validation and deployment.

ShopEasy — React.js, Node.js, Express.js, MongoDB, Redux Toolkit, Cloudinary, Tailwind CSS

[Live Demo](#) — [Github](#)

- Spearheaded a robust **full-stack e-commerce** architecture using the **MERN stack**, implementing **JWT-based stateless authentication** and integrating **Razorpay** for frictionless transaction processing.
- Designed a **responsive user interface** with **React.js** and **Tailwind CSS**, leveraging **Redux Toolkit** for **centralized state management**, achieving faster real-time product filtering.
- Developed a **role-based admin dashboard** with **RESTful APIs** for **product, order, and user management**.
